

## ABOUT YOURCFO

YourCFO is a network of CPA's, bookkeepers and human resources professionals dedicated to your business and personal success.

We work with startup and established small business clients to help them acquire financing and setup or improve all facets of their financial operations. We also help more mature organizations expand by acquisition, or prepare for retirement and succession. In short, we provide small businesses and their owners the resources of a Chief Financial Officer, without the six-figure salary.

Our value proposition is simple. By relieving you of non-core business functions, you will have more time to devote to those efforts that grow your business. YourCFO maintains relationships with several investment managers, local banks and IT consultants—even other CPA firms—to help better serve our clients' needs.

## **Choosing Small Business Accounting Software**

QuickBooks™ is the most widely used small business accounting package. The optional solutions you may bundle with this software make it a true one-stop solution.

QuickBooks™ offers applications suited to a wide variety of businesses from Retail Point of Sale to Construction contractors and everything in between.

Choosing the proper version of QuickBooks™ can be a difficult task. The most basic versions of the software do not allow you to bill customers or record payables to your vendors. Some versions are better suited to service organizations while others allow for multiple concurrent users.

One feature nearly all versions of QuickBooks™ have in common is the seamless integration of payroll processing. From do-it-yourself to full service payroll solutions, QuickBooks™ offers a service likely to meet your needs.

YourCFO will work with you to evaluate your needs and help you select and implement the QuickBooks™ solution that is right for your business.

QuickBooks is a trademark of Intuit, Inc.  
Peachtree, FAS and ACT! are trademarks of Best Software SB, Inc.  
Crystal Reports is a trademark of Business Objects, SA.

Like QuickBooks™, Peachtree™ offers a variety of feature-rich applications for small to more mature businesses. There are several versions of Peachtree™, one of which will most certainly meet the needs of your enterprise.

While QuickBooks adequately serves the needs of the majority of its users, there are certain cases where you may wish to consider Peachtree™ as an alternative. For example, Quickbooks™ only allows one method of valuing inventory. If you prefer to use an alternative manner, then Peachtree™ will be a better solution.

Peachtree™ integrates with several popular applications such as ACT!™ contact management and FAS™ fixed assets tracking software. It also provides full-featured payroll offerings comparable to QuickBooks™, and the Premium editions include Crystal Reports™.

While QuickBooks™ is the most widely used application, it may not be appropriate in all cases. YourCFO will work with you to evaluate whether Peachtree™ may be a good alternative.

# Support

Selecting a software package is only the beginning. Setting up the chart of accounts, adding employees and creating inventory items can be daunting tasks to even the most experienced users.

QuickBooks™ certifies accountants who complete an extensive training and testing program as Certified QuickBooks™ ProAdvisors. Best Software, maker of Peachtree™, has similar certification standards for its Accountants Network. When seeking help, you can rely on these certified experts.

YourCFO is a proud member of both organizations and will assist you in tailoring your accounting software to meet your specific needs. We offer training in topics ranging from database administration to invoice data entry. Properly configured, these powerful applications can save you considerable time and effort and allow you to focus on running your operation - not on bookkeeping.
